PERSONAL SKILL

CREATE A DATA BASE FRAMEWORK WITH SPREED SHEETS

Connect to BOT

I have an idea to build a data framework using spread sheet, then connect it with BOT telegram using Java Script (JS) programming language to monitor data data cooperation with the project.

BOT : https://t.me/DaapAutoReport_bot

The screenshot shows a Google Sheet titled "DaapAuto database". The sheet contains a list of social media posts in columns A and B, categorized by day (e.g., /day1twitter, /day1telegramchannel). To the right of the posts, there is a table with the following columns: No, Date Start, Shilling, Service, and LINK Report. The table lists data for various dates, including November 23, 2023, and September 23, 2023, with corresponding shilling values and links to reports.

No	Date Start	Shilling	Service	LINK Report
1	13 November 23	1	Post Twitter	https://x.com/cryptolr_IDN/status/1722529488712642742?s=20
